Professional Experience

ChronoChip

Data Analyst

Mar 2026 – Jun 2026

- Built an event tracking framework within PostgreSQL and Mixpanel, structuring data based on events related to onboarding, engagement, and application status for a product with no previous analytics structure, which helped measure how the product was performing.
- Analyzed onboarding funnel data from Mixpanel in two test phases and found only **60%** of users completed interest selection in phase one. Identified that category limitation led to user drop off mid-selection. After modifying it, completion rose to about **83%** in phase two.

Bright Mind Enrichment | Remote, United States

Data Analyst

Aug 2025 – Mar 2026

- Analyzed volunteer retention and staffing levels on a weekly basis across **8+** programs run by BME using a Power BI dashboard connected to Excel with program data. Identified an imbalance so leadership could focus on recruiting for programs lacking staff members.
- Compiled outreach notes and mentoring observations that volunteers recorded independently into Excel, using pivot tables to summarize **150+** meetings. Identified key requirements people needed, helping leadership plan supplies.

Cognizant | Hyderabad, India

Programmer Analyst

Jul 2022 – Dec 2023

- Handled **10–15** weekly ad hoc SQL requests from senior analysts on Macy's loyalty team, which supports a **30M+** member Star Rewards program across Bronze, Silver, Gold, and Platinum tiers. Pulled transaction and redemption data from Oracle that they used for campaign targeting and retention decisions.
- Resolved a recurring issue in redemption reports that was overstating actual rewards redeemed. Found a join that was duplicating customer records and fixed it, cutting repeat investigation time by about **30%**.
- Identified incomplete ETL loads on **3 to 4** occasions by comparing daily transaction counts against the past 7 days, preventing inaccurate redemption and revenue numbers from going into the weekly reports.
- Owned weekly KPI reporting across **5+** metrics including redemption rate, active versus inactive customer counts, and tier upgrade volume across Bronze, Silver, Gold and Platinum, feeding senior analysts the numbers used in stakeholder dashboards for marketing and campaign planning.

Student Intern

Jan 2022 – Jun 2022

- Built a Claims Management System as the internship capstone, developing REST APIs in Java and Spring Boot, connecting an H2 database, and linking it to a React frontend to simulate an end-to-end claims workflow.
- Tested API endpoints using Postman and presented the working system to subject matter experts, covering the end-to-end data flow.

Projects

Feature Adoption and Retention Analysis | SQL (Snowflake), Mixpanel, Excel | GitHub

- Built a tracking framework in Snowflake mapping 4 event signals to test retention drivers, finding feature-engaged users retained at **2–3x** higher rates through Day 30 and recommending nudges to lift click-through from **28%** to **38%**.

Apple and Microsoft – Performance and Predictive Analytics | Power BI, Python, DAX | GitHub

- Built a 4-page Power BI report analyzing 15 years of financial data via a DAX star schema, finding Microsoft earns **\$0.98** in operating profit per \$1 of OpEx versus Apple's **\$0.46**.

Technical Skills

Programming and Querying: SQL (Window Functions, JOINS, CTEs), Python

Visualization and BI: Power BI (DAX, Power Query, Data Modeling), Tableau, Excel (Pivot Tables, Macros)

Databases and Tools: PostgreSQL, MySQL, Snowflake, Oracle, Mixpanel, Alteryx

Analytics and Business Skills: KPI Development, EDA, Statistical Analysis, Data Cleaning, Requirements Gathering

AI and Automation: Claude AI, ChatGPT, Prompt Engineering, LLM Assisted Analysis

Certifications

SQL Associate | DataCamp

Data Analyst Associate | DataCamp

Alteryx Designer Core | Alteryx

Excel Advanced User | Isenberg School of Management

Education

University of Massachusetts Amherst | M.S. Business Analytics | GPA: **3.7/4.0**

Feb 2024 – May 2025

Sathyabama Institute of Science and Technology | B.E. Computer Science | Chennai, India

Aug 2018 – Jul 2022
